Make Your Home More Precious!

CUTTING'S NURSERY
BYRON, MINNESOTA

PHONE BYRON 2711

Spring 1957

This Catalog Is Our Invitation to You . . .

to visit our nursery and greenhouse this spring, where you will find almost everything you can think of in the line of trees, shrubs, evergreens, fruit trees, perennials and vegetable and flowering plants.

When you wish to purchase some article there are several factors which will determine where you will make the purchase. These factors are: quality, price, convenience, opportunity of seeing the goods before making the purchase, a good assortment of goods from which to make your selection and the opportunity of obtaining reliable information about the goods in which you are interested. We present the following facts regarding the service we have to offer:

QUALITY.—We have always endeavored to produce stock of the very best quality with respect to stockiness, size, hardiness and good root system. Because of its larger better quality you don't have to wait several years for our nursery stock to make a showing.

PRICE.—Our prices are about one-half those charged by tree agents, and the only nurseries that can sell cheaper than we do are those farther south where they have cheap labor and a longer growing season—and produce stock that will not stand our cold winters.

SEEING WHAT YOU ARE GETTING.—Many of our customers tell us about having bought trees or shrubs from some distant nursery and being terribly disappointed in what they received. Come here and you see just what you are getting and you have a chance to compare the different sizes and select the one best adapted to your needs.

A GOOD ASSORTMENT.—During the past fifty-five years we have tried most every variety of tree, shrub and fruit that has been planted in this climate and if you do not find the variety in this catalog that you are interested in it is likely that we have discarded it for something better, or we did not have room to list it.

RELIABLE INFORMATION.—One advantage you have in coming directly to our nursery is that you may ask questions about the care, growth and other matters pertaining to the varieties in which you are interested and they will be answered by men who have had years of experience in handling plants and trees.

For your convenience we will be open during the spring planting season on Sunday afternoons from 1:00 p.m. to 5:00 p.m.

PLEASE DO NOT EXPECT DIGGING DONE ON SUNDAY

Hardy Ornamental Shrubs

People are appreciating more the permanent value and beauty of shrubs. The charm and grace they lend to the home grounds is invaluable, and if judicious selection is made, it is possible to have a continuous succession of bloom from early in April to the days when frost again nips the flowers of the very latest blooms.

Shrubs cover such a wide range of size, form and color that you can find some variety adapted to each location or use. The two outstanding uses of shrubs are: to soften the stiff, straight lines and angles of the house; and to hide any undesirable view such as a bare wall, an old building, or the untidy backyard of your careless neighbor.

SYRINGA OR MOCK ORANGE MINNESOTA SNOWFLAKE—

An outstanding introduction, every blossom a very double pure white, and when fully open several layers of petals are in display. The season of flowering is late June and early July. The large, dark green leaves have a robust texture, and unlike other Mock Oranges, the foliage extends over the lower branches. The shrub is thoroughly hardy, extremely vigorous and long-lived. It is useful for screen, tall border and specimen plantings. Minnesota Snowflake is undoubtedly the most valuable shrub introduction of recent years. 2-3 ft., \$1.50; 3-4 ft., \$2.00.

LEMOINE—

A showy, free blooming variety with slender twiggy and slightly arching branches. Flowers are creamy white, fragrant, smaller size than most of the varieties but because of their profuse blooming habit are most effective at blossom time. 2-3 ft., \$1.25; 3-4 ft., \$1.50.

BOUQUET BLANC—

A semi-dwarf shrub, with many fragrant, white flowers. 3-4 ft., \$1.25.

NEW DWARF MOCK ORANGE FROSTY MORN MOCK ORANGE—

A dwarf growing Mock Orange with pure white, very double, fragrant flowers blooming in June and July. A hardy shrub attaining only 40 inches in height. Very useful for specimen planting in landscaping your ranch style home. 15-18 inch, \$1.25.

VIRGINAL—

One of the finest of the improved Mock Oranges. Flowers are very large with large petals and double crested. Usually borne in clusters of 5 to 7. Sweet scented and long blooming. We consider this to be one of the very best blooming shrubs we can grow in Minnesota. Will bloom the first season. 2-3 ft., \$1.25; 3-4 ft., \$1.50.

GOLDEN MOCK ORANGE—

Bright golden yellow leaves make this dwarf shrub valuable to color shrub groups. Cheerful and attractive all through the summer. 15-18 inch, \$1.75; 18-24 inch, \$2.00; 2-3 ft., \$2.50.

GRANDIFLORA—

An upright, rapid growing shrub, well adapted for background planting. Has large single white flowers in June. 3-4 ft., \$1.25; 4-5 ft., \$1.50.

What a beautiful sight this Snowflake Mock Orange makes in the yard.

FORSYTHIA OVATA

Has ascending branches which arch gracefully. Flowers are pale primrose-yellow, making a beautiful sight in April before the leaves are out. Should be pruned directly after blooming to make compact bushes. If branches are cut in late winter and placed in water they will bloom in the house. 2-3 ft., \$1.00.

BUFFALO BERRY

An attractive silvery shrub, bearing masses of brilliant berries in late summer and fall. A handsome ornamental up to 12 feet tall. 3-4 ft., \$1.50.

COMMON SMOKE TREE

(*Rhus cotinus*)

Bears huge, plumy masses of green or purple flower stems in August and September. Grows 10 to 12 feet high. 3-4 ft., \$2.25.

CARAGANA

SIBERIAN PEA TREE—

Extremely hardy. Blossoms are pea-like and yellow in color, coming forth in small clusters in late spring. Fine for border or group planting. Does well in shade. 2-3 ft., 75¢; 3-4 ft., \$1.00.

DWARF ARCTIC WILLOW

A new dwarf shrub with beautiful silvery blue-green, feathery foliage that makes a welcome introduction of new color. It does well in dry or wet soil, in sun or partial shade. If left untrimmed it makes a compact dwarf shrub of about 3 to 4 feet or trimmed it makes a fine low hedge. 15-18 inch, 50¢.

DOGWOOD

SIBERIAN RED TWIGGED—

Good for border planting where the smooth slender bright red branches make a pleasing contrast with snow and evergreens. Small white blooms early in summer, succeeded by a fall crop of ornamental berries. 2-3 ft., \$1.00; 3-4 ft., \$1.25.

VARIEGATED DOGWOOD—

The green leaves are striped and margined with white. Red colored bark. An unusual plant making a bright spot of color in the shrub group. 2-3 ft., \$1.50.

POTENTILLA

CINQUEFOIL—

A compact, dwarf shrub, suitable for the foundation planting or in front of shrub border. Blooms all summer. Flowers are a bright yellow. 12-15 inch, 50¢.

FRENCH LILACS

CHARLES JOLY—

Double. Purple-red. One of the best double dark reds. Bush medium both in size and height, limbs growing very upright. Rather large blooms, held erect well above the foliage, very striking. 18-24 inch, \$1.50; 2-3 ft., \$2.00.

PRES. GREVY—

Double. Light blue. Immense panicles, very double and symmetrical. A clear soft, delicate blue. One of the older sorts and still one of the most desirable. 3-4 ft., \$3.00.

PRES. CARNOT—

Double. Orchid pink. This Lilac bears enormous trusses of fully double, rosy lavender blossoms. The individual flowers are a beautiful late pink shade when fully matured. 2-3 ft., \$2.00; 3-4 ft., \$3.00; 4-5 ft., \$3.00.

PRES. LINCOLN—

Single. Light blue. This distinctive single Lilac comes as close to a true, blue color as any other variety known. It produces a heavy blossom and is best known for its unusual color. 3-4 ft., \$3.00; 4-5 ft., \$3.50.

LUDWIG SPAETH

Single. Red. Although one of the oldest of the improved Lilacs still it is one of the very best Lilacs grown. Color a brilliant intense rich purple-red, that holds up well in the sun and lasts a long time. Bush large and a very profuse bloomer. A wonderful Lilac. 2-3 ft., \$2.00; 3-4 ft., \$3.00.

MME. CHATENAY

Double white. This is one of the truly fragrant Lilacs. It produces a fully double, pure white, large truss. 2-3 ft., \$2.00; 3-4 ft., \$3.00.

LILACS

FRENCH HYBRID LILAC SEEDLING—

These are seedlings of the beautiful French Hybrid Lilacs with all the various colors. These are very bushy shrubs; just the thing for that screen of mixed color of Lilac beauty. **Assorted colors.** 2-3 ft., \$1.00; 12 for \$11.00.

PERSIAN LILAC—

A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 8 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common and does not sprout from the roots. 2-3 ft., \$1.00; 3-4 ft., \$1.25; 12 for \$14.00; 4-5 ft., \$1.50.

The new Zabeli Honeysuckle grown in our nursery with lots of room, allows it to develop many branches. This red flowered shrub makes a good screen, trimmed or grown natural, as well as a good specimen plant.

EUONYMUS

WINGED-BARK BURNING BUSH—

This outstanding shrub is one of the very best we have. Bright yellow flowers in Spring, followed by clusters of brilliant red berries, which hang until mid-Winter. Leaves turn to beautiful **crimson-scarlet** in the Fall. Attains a height of 8 to 10 feet. **2-3 ft., \$2.75.**

DWARF BURNING BUSH—

The same qualities as the above shrub, except a dwarf growing shrub, just the thing for the new rambler homes and under windows to add color to the foundation planting. Thrives in shade. **18-24 inch, \$2.50.**

↓ JUNEBERRY

A very early blooming shrub, growing about four feet high. White flowers are followed by edible blue berries resembling huckleberries which ripen in late June. Birds are very fond of these berries. **2-3 ft., \$1.00.**

JAPANESE FLOWERING QUINCE

An early blooming shrub, covered with clusters of orange-scarlet flowers, growing about three to four feet high. Bushy, dense dark shiny foliage. **18-24 inch, 75¢.**

ALPINE CurrANT

One of the best shrubs for very shady locations. A dwarf shrub of dense growth with fine dark green leaves. Unexcelled for a low hedge. **12-15 inch, 75¢; 15-18 inch, \$1.00; 18-24 inch, \$1.25.**

ZABELI HONEYSUCKLE

This vigorous, upright Honeysuckle has attractive red flowers, followed by bright red berries in late summer to autumn. It is hardy and does well in shade. It is a rapid grower and is unexcelled for a tall screen or as a snow-break. Grows quite rapidly, to 8 or 10 feet in height.

BUSHY THREE YEAR PLANTS:

	Each	25
2-3 ft.	\$.75	\$15.00
3-4 ft.	1.00	20.00
4-5 ft.	1.25	25.00

NEW DWARF HONEYSUCKLE CLAVEY'S DWARF HONEYSUCKLE—

Here is what you have been looking for—a new true-dwarf shrub for landscaping your ranch style home. Very bushy and compact with small yellow flowers and red berries. **18-24 inch, \$1.25.**

CORALBERRY

A low, slender branching shrub valuable for planting in shady places and for covering steep slopes. Its beauty lies in the masses of coral berries that ripen in the fall and usually adhere all winter. **18-24 inch, 85¢; 2-3 ft., \$1.00.**

↓ CISTENA CHERRY

PURPLE LEAVED SANDCHERRY—

Grows 3 to 4 feet high, spreading about the same. Foliage of a rich dark red which makes a valuable contrast in shrub plantings. **3-4 ft., \$2.50.**

The Black Hills Spruce—one of the finest spruces for landscape purposes.

Plant Evergreens for Year-Round Beauty

Evergreens are our most important group of trees; they grow naturally in our northern soil and climate. For groups on the lawn, as a background to the garden or in plantings by the doorway and around the house foundation the Evergreens will delight you in all seasons with their cheerful green color. We will be pleased to help you select suitable varieties for your grounds.

The only really satisfactory way to buy evergreens is to come to the nursery, make your selection, and take them home with you.

Prices Include Digging Evergreens With Ball and Burlap

ARBORVITAE

PYRAMIDAL ARBORVITAE—

The most compact and erect of the species, forming a solid pyramid of green that retains its slender shape without shearing. However, it may be made more compact and kept at any desired height by shearing. Useful for entrance and corner plantings. 2-2½ ft., \$6.00; 2½-3 ft., \$7.00; 3½-4 ft., \$9.50; 4½-5 ft., \$11.00.

SIBERIAN ARBORVITAE—

A compact, dense, bushy plant. Conical in outline. Foliage a rich dark almost bluish green. The hardiest of the Arborvitae and with distinctive size, form and foliage texture fills a place in the landscape that no other evergreen does. 15-18 inch, \$6.50; 18-24 inch, \$8.00.

GLOBE ARBORVITAE—

A dwarf, bushy evergreen that naturally forms itself into a ball-like form. Bushy and compact. Keeps its shape without trimming. Splendid for foundation plantings. One of the best all-around semi-formal dwarfs. 15-18 inch, \$6.00.

BLACK HILLS SPRUCE

One of the hardiest and finest of all spruces—symmetrical, compact and bushy in growth. The foliage varying from a green to bluish-green tint makes the trees always striking for their bright, fresh color. One of the finest spruces for landscape purposes. 18-24 inch, \$4.50; 2-3 ft., \$7.00; 3-4 ft., \$9.00.

COLORADO BLUE SPRUCE—

Selected for blue color and perfect shape. 2-3 ft., \$10.00.

BALSAM FIR

The only fir native to Minnesota. Has shiny, bright green foliage. Pyramidal in form and is useful in mixed plantings of evergreens as it is a very beautiful evergreen. 2-3 ft., \$7.00; 3-4 ft., \$9.00.

JUNIPERS

KOSTER JUNIPER—

Low spreading variety with arching branches. Bluish-green. Very hardy. 15-18 inch, \$5.50; 18-24 inch, \$7.50; 24-30 inch, \$8.50.

SAVIN JUNIPER—

Another of the most popular low foundation evergreens. More compact and a richer green than the Pfitzers. While growing in an upright spreading, horizontal manner the tips are more heavily branched so that the plant seems more compact and without the horizontal tip effect achieved by the Pfitzer. Very hardy. 15-18 inch, \$5.50; 18-24 inch, \$7.50; 24-30 inch, \$8.50.

ANDORRA JUNIPER—

A low growing spreading dwarf evergreen of real merit. Its rich silvery green of summer turns a beautiful purplish bronze in fall. As the sap starts to move in the spring, this color intensifies and becomes truly striking. With the coming of the new growth its more sombre green hue is resumed for the rest of the summer months. 15-18 inch, \$5.50; 18-24 inch, \$7.50; 24-30 inch, \$8.50.

PFITZER JUNIPER—

A graceful, broad, low evergreen with sweeping fronds of grayish or bluish-green foliage. The strong tips give a definite horizontal line to its effect. Very hardy, standing full sun and also does well in semi-shaded locations. 15-18 inch, \$5.50; 18-24 inch, \$7.50; 24-30 inch, \$8.50.

GOLDEN PFITZER JUNIPER—

Golden type of Pfitzer with bright yellow foliage on new growth. 24-30 inch, \$7.00.

HETZI JUNIPER—

A new variety of the spreading type. Very graceful appearance, with a bluish cast on the new growth. 18-24 inch, \$7.50.

DUNDEE JUNIPERS (Upright)—

This outstanding Juniper is upright growing, is bluish-gray in the spring and summer and changes to a plum-like color in fall and winter. Without doubt the most satisfactory of all the upright junipers. 2-3 ft., \$7.00; 3-4 ft., \$9.00

CANNARTI JUNIPER (Upright)—

Extremely rich dark green color which is held throughout the year. Trimming produces a compact shapely specimen of the pyramidal type. 3-3½ ft., \$10.00.

PATHFINDER JUNIPER (Upright)—

It is believed that this evergreen has the most beautiful silvery blue coloring of all the varieties of the true Silver Juniper. The habit of growth is upright, with a somewhat broader and more bushy base than is found in other varieties of the true Silver. The tips of the branches are of fine texture and tend to be upright in habit. 2½-3 ft., \$6.50; 3-3½ ft., \$8.00.

CONCOLOR FIR

One of the most beautiful evergreens, many trees having a decided bluish color. Is best used as a specimen on the lawn. 3-4 ft., \$10.00.

WE DO NOT SHIP EVERGREENS

Because of the excessive cost of packing evergreens for shipments, and the shortage of expert help for such work, we cannot ship any evergreens. You may call for them at the nursery, or we will deliver them at your home in Rochester.

A Spreading Juniper adding to the beauty of a picture window.

YEW

DWARF YEW—

A hardy dwarf, slow-growing evergreen. Foliage is very heavy and of a waxy, shiny green color. Will thrive in dense shade. 12-15 inch, \$6.00; 15-18 inch, \$8.00.

SPREADING YEW—

Usually grows about as tall as broad and does best if grown where it is not exposed to full sunlight. Foliage is dark, shiny green. 12-15 inch, \$6.00; 18-24 inch, \$8.00.

COMPACT SPREADING YEW—

An exceptionally compact form that does not get as broad as the regular spreading variety. Light shearing keeps this plant in an excellent compact shape. 15 inch, \$8.00.

UPRIGHT YEW—

The upright, pyramidal form of this variety. A compact Yew of dark green foliage, that does best if grown where it is not exposed to full sunlight. 12-15 inch, \$5.00.

INTERMEDIA YEW—

A very good variety for the deep shaded location. The waxy, shiny green foliage will liven up that shady spot. Habit of growth is between the spreading and pyramid varieties. 15-18 inch, \$6.00.

WHITE PINE

A medium to fast grower with long soft green needles that have a silvery strip down the center of the needle. Very valuable for masses, specimens and screens. 2-3 ft., \$4.00; 3-4 ft., \$6.00; 4-5 ft., \$10.00.

AUSTRIAN PINE—

A decorative, vigorous and tall growing tree. Long, slender, dark green needles. Its rapid growth and highly ornamental foliage makes it very desirable wherever a tall evergreen on the lawn is wanted. 2-3 ft., \$6.50; 3-4 ft., \$8.00.

MUGHO PINE—

Very popular compact and dwarf-growing evergreen. Unexcelled for planting about the foundation lines. In the spring the new growth resembles miniature candles at the end of each branch. 15-18 inch spread, \$8.00; 18-24 inch spread, \$9.00; 24-30 inch spread, \$10.00.

PACHYSANDRA TERMINALIS

(Spurge)

A ground cover plant 6 to 8 inches high, forming broad mats of bright, glossy green foliage. This plant will grow in shady locations and is the only plant to grow under evergreens. \$6.00 per dozen.

CARE OF EVERGREENS

There is nothing that adds so much to the beauty of the city home or farm as a planting of evergreens, but you cannot just plant them and let them shift for themselves.

If a dormant tree or shrub is alive when you receive it from the nursery it is almost certain to live if carefully planted, but an evergreen is different. It may be freshly dug and have plenty of roots but it is covered with foliage and must have plenty of water to replace that evaporated from the foliage. Of course everyone gives it plenty of water when planting but that is not enough. It is usually sufficient if it has a thorough soaking once a week during the first summer.

Have a depression around each tree so that when you water it the water will not all run away but will soak down to where the roots are.

Don't omit a watering because there has been a shower—it takes a heavy rain to soak a foot into the ground. When an evergreen looks as if it is sick, it is already dead.

Evergreen, especially Arbor Vitae, are very convenient "watering posts" for dogs but all you need is to put some 16 inch wire fencing around them. But do it now and not after the damage is done.

And there is the Red Spider which begins to work when it gets hot and dry. When they begin to suck the juice, the evergreens will have a grayish cast, or you can easily tell if they are present by holding a sheet of white paper under a twig and tapping the twig.

The Red Spiders are almost invisible and look like specks of dust but are always moving. A dose of cold water will check them and some Dusting Sulphur will kill them.

Watering Evergreens

Nearly all the loss in newly planted evergreens is caused by lack of sufficient water. A thorough soaking with water twice a week during the first year is usually all that is required. There must be a depression around each tree so the water will not run off, and it should be a definite job of some member of the family to do the watering on a certain day of each week.

Hedges—Beautify As They Serve

Hedges give a finish that nothing else can give and serve as a fence as well. Whether it is used as a living wall of green, neatly trimmed and kept within bounds, or as a free growing row of shrubs which screen out unsightly views, there is nothing quite so satisfactory as a hedge. When little space is available, the hedge makes an ideal boundary planting. The hedge is decorative the year around and will add much to your lawn.

We are growing only the varieties of hedge plants that have been found to be very satisfactory for this territory.

BUCKTHORN

This not only makes a very ornamental hedge but is the best variety for protection as the branches are stiff and makes a stout hedge of any height from 2 to 10 feet. Our plants have been transplanted and twice cut back making them much superior to the seedling plants sold by some nurseries at a lower price. Plant 12 inches apart.

	10	100
2-3 ft.	\$4.00	\$35.00
3-4 ft., three or more stems	5.50	50.00

ALPINE CurrANT

Absolutely hardy, free from disease and insect pests, bright green foliage which remains on the plants until late in fall. Grows very bushy and is best variety for ornamental hedge from one to three feet in height. Plant fifteen inches apart.

	10	50
12-15 inch	\$ 7.00	\$30.00
15-18 inch	10.00	45.00
18-24 inch	12.50	60.00

THUNBERG'S BARBERRY

A graceful shrub becoming very beautiful in fall with its yellow and red leaves and red berries. Its dense growth and sharp briars make it a good hedge plant for protection from trespassers. Plant 12 to 18 inches apart.

	10	100
15-18 inch transplants	\$4.50	\$40.00

CASH AND CARRY

We are always glad to have our customers come to the nursery and make their own selections. It does not usually take long to assemble your order and we can pack most any ordinary order so you can carry it on your car.

We make frequent deliveries to nearby towns—every day to Rochester—and can usually arrange to deliver any order that you cannot carry with you.

SPIREA VAN HOUTTE

Often used as a sheared hedge but is especially adapted for use as a screen or snowbreak, planting them from 2 to 4 feet apart and allowing them to grow to their natural height of six to seven feet. 2-3 ft., \$10.00 per 25; 3-4 ft., \$15.00 per 25.

HONEYSUCKLE

ZABELI RED—

Sometimes used as sheared hedge, 4 to 6 feet high, but is unexcelled for a tall screen or border, growing 10 to 15 feet high.

	25	100
18-24 inch	\$ 8.00	\$24.00
2-3 ft.	10.00	35.00
3-4 ft.	20.00	
4-5 ft.	25.00	

SHEARING EVERGREENS

Evergreens planted on the lawn can usually be allowed to grow about as they like, but those planted near the house must be properly sheared or they will not only get too large but will often become open and scraggy. This shearing is easy to do and most anyone can do it but it is very important that it be done at the proper time. The shearing will be much more satisfactory if done every year so it will not be necessary to cut anything except the present year's growth. In cutting this new growth there should be at least an inch left on each twig as this will encourage the production of new buds from which next year's growth will start.

Shear Mugho Pine the first week in June, Spruces during the latter part of June.

Junipers and Arborvitae may be sheared in early spring if they had not been sheared the summer before, to be followed by the usual summer shearing. The regular annual shearing of these varieties may be done any time from June through August, probably the best time being the latter part of July.

Shade and Ornamental Trees

For shade, shelter and lasting beauty about your home

The Long-time Favorites for Lawn and Street Planting

1. To provide *shade* in the desired locations on the lawn and near buildings, at different times of the day.
2. To *frame* the home and its views.
3. To provide a *background* for gardens and buildings.
4. To *screen* undesirable views.
5. To *protect* from cold winter winds.
6. To provide *color* in flower, foliage or fruit.

AMERICAN ELM—

America's noblest and most popular shade tree, large and spreading, combining strength and grace. One of the best lawn and boulevard trees—majestic, hardy, permanent. The prices are for well shaped specimen trees. The measurement in inches means the diameter of the tree just above the ground. 6-8 ft., \$2.50; 8-10 ft., \$4.50; 1-1½ inch caliper, \$5.50; 1½-2 inch caliper, \$7.50; 2-2½ inch caliper, \$9.00.

BIRCH, Cut-Leaf Weeping—

We have always considered this one of the most graceful as well as among the most beautiful of all ornamental trees. It seems to fit in anywhere it is planted, and after it is once established the owner seems to love it as no other tree. A beautiful upright growing tree with long, slender, gracefully weeping branches. The leaves are delicately cut, the bark a brownish green at first gradually turning to a pure glistening white. 6-8 ft., \$6.00; 8-10 ft., \$8.00.

MORAINE LOCUST—

(Plant Patent No. 836.) New seedless and thornless variety. Is a round headed tree when young but tall and vase-shaped when older. May be used as a graceful accent for informal

lawn borders or background plantings, as a stately specimen shade tree or as a frame for a scenic vista. Hardy, fast growing and resistant to disease and insect damage. Needs very little care. The shape of the tree and the laciness of its compound leaves let sunlight filter through to encourage lawn grasses. 6-7 ft. whips, \$7.00.

MOUNTAIN ASH

The combination of foliage and clustered fruits make this a very beautiful lawn tree. Bright red berries, white flowers. Used as specimen on the lawn or as an accent in the border. Grows 30 feet high. 5-6 ft., \$3.00; 6-8 ft., \$4.00; 8-10 ft., \$5.50.

GREEN ASH—

The hardest of all the native trees. Useful for parks and streets, or for lawn planting. Shapely and handsome. 5-6 ft., \$2.00; 8-10 ft., \$5.00; 1¾-2 inch, \$6.00; 2-2½ inch, \$9.00.

MAPLE, Crimson King—

(Plant Patent No. 735.) This beautiful ornamental is a form of the Schwedler Maple that was selected in Europe for its brilliant crimson leaves. The color is retained throughout the summer. **6-7 ft. whips, \$6.00; 7-8 ft. whips, \$7.00; 8-10 ft. branched, \$11.50.**

MAPLE, Silver or Soft—

A good appearance and rapid growth make this tree very popular where an immediate effect is required. **6-8 ft., \$2.00; 8-10 ft., \$4.00; 1-1½ inch caliper, \$5.00; 1½-2 inch caliper, \$6.00.**

MAPLE, Hard or Sugar—

This is one of the most beautiful of shade or boulevard trees. It is stately in all seasons, but truly gorgeous in fall when its dense leaves are brilliant yellow, orange and scarlet. For beauty and permanence Hard Maple cannot be surpassed. **\$4.00 to \$12.00.**

MAPLE NORWAY—

A handsome lawn and shade tree forming a perfect rounded head of broad, dark green leaves. Not as tall growing as the other maples. **8-10 ft. branched, \$7.50.**

SCHWEDLER'S MAPLE—

One of our most beautiful and colorful shade trees, famed for its beautiful red foliage in spring. As the leaves open up in the spring they take on a bright purplish or crimson color which later turns to a deep rich green frequently retaining a dark purplish tinge in the veining. **8-10 ft., \$7.50.**

WHITE BIRCH—

A beautiful, graceful, upright growing tree of medium size, famed for its striking white bark. Effective when planted singly or in groups. Clusters of three or four planted in one clump will give the most desirable and most naturalistic effect. **6-8 ft., \$4.00; 3 for \$11.75.**

**Clump Birch of 3 or more stems,
6-7 ft., \$7.50.**

NIOBE WEEPING WILLOW—

The golden Weeping Willow, the most beautiful in that species. Splendid as a lawn tree, for planting near pools or along the banks of streams. A graceful weeping tree with rich golden bark on trunk and along the long slender weeping branches. Hardest of all the Weeping Willows. Very beautiful in the winter because of its rich yellow bark, which makes it very conspicuous. Hardy here in Minnesota. **6-8 ft., \$3.00.**

Lombardy Poplar

LOMBARDY POPLAR—

Tall, stately landscape tree for accent points, quick screens, backgrounds and driveways. Very picturesque and very useful. Has glossy leaves that shimmer in the sunlight. Branches grow close to trunk and upright to form a tall, slim column. Fastgrowing and hardy.

	5 or more each	each
5- 6 ft.	\$1.25	\$1.00

HACKBERRY—

One of the fine trees for shade or boulevard planting. It grows quite rapidly, to a uniform shape. It is extremely hardy and develops strong crotches. An interesting tree as a specimen or in a background planting. **5-6 ft., \$2.00; 6-8 ft., \$3.00; 8-10 ft., \$4.50; 1½-1¾ inch caliper, \$8.50.**

Roses

HARDY BUSH ROSES

HARRISON YELLOW—

Is perhaps the best known and most common June bloomer. 5 to 6 feet tall, it is a perfect mass of bright yellow, double roses, 1 to 2 inches across, for several weeks in June.

F. J. GROOTENDORST—

The beautiful effect of the many clusters of small, bright red Roses is familiar to many. Blooms almost continually. Compact, bushy growth.

HANSA—

A large double, deep red Rose of pleasing fragrance. Foliage rich dark green. Bush is very hardy and is a splendid ornamental shrub. Strong 2 yr. plants of the above varieties, \$1.25.

CLIMBING ROSES

PAUL'S SCARLET CLIMBER—

The brightest and purest red of all the pillar roses. Vivid scarlet, shaded crimson, semi-double flowers in clusters, that retain their color till they fall. A vigorous grower with a profusion of blooms that remain for a long season. 2 yr., \$1.25.

EVERBLOOMING BLAZE—

New improved strain of the popular climber, blooming throughout the summer season until frost. Brilliant 2 to 3 inch, cupped, scarlet-red flowers. 2 yr. plants, \$1.45.

NEW DAWN—

Everblooming climbing rose having apple blossom pink flowers with old rose fragrance. 2 yr. plants, \$1.25.

Peat For Lawns and Gardens

Peat Humus mixed with sandy soil enables it to retain moisture, or if incorporated into a heavy clay soil will prevent it from becoming too sticky when wet or from baking brick-like during dry weather. A mulching on the surface holds the moisture in the soil and prevents injury to the roots from drought or severe freezing.

We have Peat Humus in the granulated form at 75¢ a bushel.

HYBRID TEA ROSES

CHRISTOPHER STONE—

Vivid scarlet, free blooming, fragrant.

CRIMSON GLORY—

Well known deep velvety crimson of merit.

GARNETTE—

Comparatively new variety producing petite red sweetheart roses.

NIGGER BOY—

Double, high-centered, fragrant. Dark velvety, blackish maroon.

GOLDEN DAWN—

Bud rich sunflower-yellow flushed old rose. Double.

ECLIPSE—

Long streamlined bud, rich gold without shading.

K. A. VIKTORIA—

Popular, snowy white, double.

ENA HARKNESS—

Famous English award winner producing crimson-scarlet blooms. Holds color well.

PICTURE—

Velvety-clear rose-pink with undertone of salmon. Very double.

THE DOCTOR—

Large, beautiful buds opening to enormous semi-double, cupped flowers of satiny-pink. Fragrant.

PRES. HERBERT HOOVER—

Beautifully colored buds and blooms of yellow with pink and flame tints.

McGREDY'S IVORY—

Large, well shaped, creamy-white; fragrant.

CONDESA DE SASTAGO—

Deep coppery-pink inside, golden-yellow reverse, double.

FLORIBUNDA ROSES

FLORADORA—

Scarlet and geranium red floribunda producing double 25 petal flowers.

Prices of Hybrid Tea and Floribunda Roses—Started and Growing in Cloverset Pots, Sure to Bloom This Season—\$1.75 each.

OUR GUARANTEE

We guarantee our nursery stock to be true to name; if anything proves otherwise, we will replace it free with the genuine or refund the amount you paid for it.

Everblooming Patented Roses

We supply these roses in potted, growing plants
sure to bloom for you this season.

Windbreak Trees

These evergreens have been transplanted several times, are grown with plenty of room and are well rooted.

They will not be taken from the ground until you come to get them and if any of them do not live it will be because you have not given them proper care so we are making these low prices on them with the understanding that we do not replace any that may die.

BLACK HILLS SPRUCE—

PRICE EACH—BARE ROOT

	1	10	25	more	50 or

Lombardy Poplar	3-4 ft.	14.00	

Planting

Nursery Stock

Most nursery stock can be planted in either spring or fall with equal success. Spring planting starts as early as the ground is in good "working" condition. Stock may be planted as long as it is dormant, but the earlier it goes in the better. Evergreens must be planted before any new growth starts.

Fall planting of evergreens starts in early August and continues until freeze-up but the fall planting of shrubbery and other deciduous stock does not usually start until early October, or as soon as the plants become dormant.

Bare roots of plants must be protected at all times from undue exposure to sun and wind, as even a small amount of "drying out" will definitely impair the chances of the plant making a satisfactory growth. The hole for planting should be larger than the spread of the roots and only the best black topsoil should be used around its roots. It is safest not to use any manure in the hole, although pulverized peat mixed with the soil may be highly beneficial. The roots should be well spread, the soil worked carefully around them (avoiding air pockets) and then well firmed by tramping or by "water packing" with a running hose.

Fertilizer

GRAS-GROWER 8-8-6

A completely balanced plant food for lawns, shrubbery, flowers and trees. Contains more nitrogen than most fertilizers. 50 lbs. \$2.75; 100 lbs., \$4.95.

Climbing Vines

CLEMATIS, JACKMANII—

Flowers, when fully expanded, are 4 to 6 inches in diameter, intense violet-purple, with a rich, velvety appearance distinctly veined. It blooms continually from July until cut off by frost. Potted plants, that will bloom the first season, \$1.25 each.

Extra Heavy Plants, Ball & Burlap, \$2.00.
THESE PLANTS ARE NOT MAILABLE

BITTERSWEET—

Native climber, with handsome, glossy foliage. The flowers are not conspicuous, but the chief glory of the vine consists of the large clusters of beautiful, orange-crimson fruits, in quaint yellow husks, retained all winter. Bright in effect, its graceful sprays of berries are charming for winter house-decorations, and are used for draping doorways, mantels, and pictures. 2 year, \$1.00.

BOSTON IVY—

Used generally to cover walls, its fine shoots extending to the roofs of tall buildings. In the fall the leaves assume the most gorgeous and varied tints. The young leaves are quite distinct from those which are of older growth. The vine can be made to cling even to wood. The young plants require some covering in winter for a year or more. Not altogether hardy in Minnesota. 2 year, \$1.00.

ENGELMAN'S IVY—

This variety is a rapid grower, has beautiful dark green foliage, and in the fall gives a beautiful autumn effect, the leaves changing to almost crimson. It is used to great advantage on churches and large buildings of all kinds, to soften the hard stone and brick effects. 2 year, \$1.00.

SCARLET TRUMPET HONEYSUCKLE—

Hardest and most generally used variety. This bears during the summer clusters of scarlet, tubular flowers and is one of the freest and best varieties. Handsome in foliage and fruit. 2 year, \$1.00.

GOLDFLAME HONEYSUCKLE—

The large flame-coral trumpets lined with gold, fragrant after nightfall, appear in immense showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. The dark, blue-green foliage is attractive in itself and makes a perfect background for the brilliance of the flowers. Hardy in all parts of the country. Allowed to grow naturally, Goldflame will climb a trellis or spread as a ground cover; if pruned it becomes a striking specimen shrub. 2 year, \$1.00.

Hardy Pears

PARKER—

Introduced by the Minnesota State Fruit Farm, this splendid pear is now recommended for the southern half of Minnesota. The fruit is medium to large, with smooth skin; color, yellow-bronze with faint blush.

PATTEN—

This pear has been thoroughly tested and is now recommended for planting in southern Minnesota and suggested for trial in favorable locations farther north. The fruit is of good size, resembles Barlett in form and color; very tender, juicy and of good quality. Season, September.

PRICES OF PEAR TREES

5-7 ft. \$2.25; 2 for \$4.00

Gooseberries

PIXWELL—

One of Professor Yeager's wonderful productions. A cross between a native wild selection and a high quality cultivated sort. The berries are very large. The plants are rapid growing and vigorous. A heavy bearer. Fruit on long stems and bushes sparse in thorns, hence they are easy to pick.

Gooseberry Prices

	1	3	6
2 yr. plants	\$.85	\$ 2.40	\$ 4.20

Strawberries

Strawberries should always be planted in the spring, the earlier the better.

EVERBEARING

The Everbearing varieties will bear the first season from August until hard freezing weather. Blossoms should be pinched off until the middle of July so plants may become established.

STREAMLINER—

The berries are large and a red color so bright they glisten as though varnished. Many think they are the sweetest of all Everbearers. It will bear this summer, starting 60 to 90 days after planting and continue until freezing. Next year it will produce a heavy spring crop and then besides you will get fruit during the summer and fall. It is such a vigorous grower that in rich soils it makes a lot of new plants. 12 plants, 90¢; 25, \$1.75; 50, \$3.00; 100, \$5.50.

RED RICH—Plant Patent No. 993—

This variety is highly recommended for its quality, size, productivity and plant-producing ability. Potted growing plants, 12, \$3.50; 25, \$7.00; 50, \$12.00; 100, \$20.00. These plants are not mailable.

Currants

RED LAKE—

Originated recently at the Minnesota State Fruit Breeding Farm—finest of all Red Currants. The berry is unusually large in size and of superior quality; the clusters are long and filled out to the top, with stems sufficiently long to make picking easy. Berries are a clear light red and the quality excellent. The bush is vigorous, upright, and productive. Ripens early mid-season, but holds on over a long period so it can be used or marketed as desired. 2 yr. plants, 50¢; 3 for \$1.30.

Replace Agreement

Any evergreens, except windbreak evergreens, that do not live through first summer will be replaced at one-half price. All other trees, shrubs or perennial plants that do not live through the first summer will be replaced free of charge.

JUNE BEARING

DUNLAP—

June bearing. Mid-season. An old favorite. One of the best known and most widely grown strawberries in the north and eastern half of the United States. 25 plants, \$1.10; 50, \$1.75; 100, \$3.00; 200, \$5.00.

PREMIER—

Perhaps the most popular June bearer at the present time. Ripens very early, productive and hardy, also a fair to good plant maker. Berries bright red, fairly firm, of good quality. 25 plants, \$1.10; 50, \$1.75; 100, \$3.00; 200, \$5.00.

MINNESOTA—

Developed by the Minnesota Fruit Breeding Farm. One of the outstanding varieties; ripening one to two weeks earlier than most June bearing varieties. Their uniform size and long bearing of fine flavor and excellent quality make them a big favorite. You will like the Minnesota. Very hardy. 25 plants, \$1.10; 50, \$1.75; 100, \$3.00.

ROBINSON—

Ripens about ten days later than Premier and besides its other good points it is the largest strawberry known. 25 plants, \$1.10; 50, \$1.75; 100, \$3.00.

ARROWHEAD—

Very firm, extremely hardy, highest quality, very large, heavy bearer, good plant maker. 25 plants, \$1.10; 50, \$1.75; 100, \$3.00.

VIGORO
Complete plant food

APPLES

PRICES OF APPLE TREES

Each	5	10
5-7 ft.	\$2.15	\$10.00

ORIOLE—

When August rolls around do you crave a nice juicy apple? Then Oriole is for you. The earliest high quality apple we know. Good for pies, too. For that first apple—crisp, juicy Oriole is it. Very hardy.

YELLOW TRANSPARENT—

Ripens about August 1st. Flesh juicy, tender and of fine flavor.

DUCHESS—

A vigorous growing, hardy tree and heavy bearer. Fruit is large, greenish yellow, striped with red. The standard early apple for the northwest.

BEACON—

The new Beacon is a fall apple, ripening with or a few days later than Duchess, and will keep for a month after harvest even without cold storage facilities. It is a highly colored, all-red variety—better eating than Duchess and is an excellent cooking apple. The tree is vigorous, productive, and very hardy. The hardy early season, the uniform size and shape, the high color and quality, together with the keeping and handling quality so different from most early apples, makes Beacon the outstanding early apple for home or for market.

WEALTHY—

The leading commercial variety for fall. In any orchard in this part of the country you will find Wealthy as the main variety. It is a great bearer, excellent for eating fresh or cooking. Fine grained and juicy. Ripens in September and is the best known and best liked of all fall varieties.

LAKELAND—

This introduction from the Minnesota Fruit Breeding Farm is a very regular annual bearer and the fruit clings until solid red. It ripens immediately after Wealthy but keeps a little longer. The dessert quality is good, and it is excellent for cooking.

MINJON—

An Apple closely resembling Jonathan in size, color and form. It is very hardy, very productive and ripens soon after Wealthy. Good eating and cooking quality. Rapidly becoming popular for commercial planting.

McINTOSH—

Fruit above medium size, yellow covered with crimson, flesh snow white, crisp, very tender, aromatic and sub-acid. October to January.

PRAIRIE SPY—

Prairie Spy is a big red apple with some green on it. An apple of the finest quality that will keep through the winter in an ordinary cellar. The tree is hardy here, a heavy bearer, and should be included in every home orchard and is undoubtedly one of the best varieties for the commercial orchard.

FIRESIDE—

It has a richness of flavor and a mildness in acidity that will appeal to the many people who prefer highly flavored, non-tart fruits of the Delicious type. Fireside produces a strongly branched, large and free growing tree which gives evidence of being a consistent annual bearer. The fruit is large, averaging three inches or more in diameter. The color is a very bright, attractive medium red, lightly striped and splashed with a darker red. The flavor is a mild sub-acid, very rich and pleasant. The quality is unexcelled for dessert purposes. Season from November to April.

NORTHWESTERN GREENING—

Fruit very large, and handsome; turning yellow as it matures. This apple is in good demand as a cooking apple in late winter and spring. A good commercial variety in the southeast third of Minnesota. Season December to March.

MALINDA—

One of the hardest, heaviest bearing longest keeping apples than can be grown here. The flesh is yellowish-white, firm, juicy and with a sweet after-taste.

HARALSON—

Its size, shape and color are just right for an ideal commercial Apple. The tree is extremely vigorous, productive and hardy. The branches spring at wide angles from the central trunk and are very strong in the crotches. The fruit will keep in an ordinary cellar through out the winter without artificial refrigeration. An early, heavy bearer. The fruit hangs well to the tree until matured, is a deep red and the flesh is firm. Is a leading market variety and keeps all winter. Is an all purpose apple and is excellent for pies.

WHITNEY CRAB—

A large, red, mild flavored Crab, excellent for eating, canning, and pickles. Perfectly hardy, never blights and is a heavy cropper.

DOLGO CRAB—

The best for jelly. Fruit is oblong, of real beauty and peculiar lemon-acid in flavor. Entirely different from any other crab apple and far superior for jellies, producing a transparent bright red jelly of high quality. The fruit is distinctly beautiful, borne in great profusion. Dolgo is a beautiful lawn tree, in addition to producing fruit of superior quality. It is a striking thing to see the masses of red fruit clustered along the branches.

Asparagus

Asparagus produces more food than anything else you can grow in the same space—you can cut it every day from late April to the 20th of June. It is very easy to prepare for eating and nearly everyone is very fond of it. And frozen asparagus is as good as the fresh. We have learned to grow asparagus plants that are much superior to any we have seen from other nurseries. This year we have a good supply of three year old plants. **Plant the roots in deep rich soil, the crowns about four inches below the surface.** Use plenty of manure and keep out the quack grass and a patch will last many years.

Plant 12 roots for each member of the family.

WASHINGTON ASPARAGUS—

	12	25	50	100
One year roots ..	\$.80	\$1.40	\$2.50	\$4.00
Two year roots ..	1.10	2.00	3.50	5.50
Three year roots	1.50	2.75		

Rhubarb

Rhubarb is the cheapest pie and sauce material you can grow, and is also useful for jam, marmalade and juice.

If planted in a fertile soil you can cut large stalks the first summer. Prices, 50¢ each; 4 roots for \$1.80.

CHAPMAN'S CANADA RED—

Very sweet, tender, of fine flavor, with extra-large stalks, bright red all the way through, the red color extending even to the mid-rib of the leaf. Does not lose its bright color in cooking, and both sauce and pies are an appetizing cherry-red color.

RUBY RED—

Another new Red Rhubarb introduced from Canada. The stalks are intensely red as the name implies—even the inside of the stalk is red. Rhubarb sauce made from Ruby is as red as strawberry sauce. The skin is so tender it can be cooked with the stalk.

VALENTINE—

A new, all red stalked, suitable for freezing variety.

2 Great New Pie Cherries

NORTHSTAR and METEOR — A PERFECT PAIR

Ripening about 2 weeks apart, you will have tree fresh cherries over a very long season. Plant some of each this spring—you'll have the best pie cherries that can be grown.

METEOR CHERRY—

Minnesota's new pie cherry, introduced by the University of Minnesota Fruit Breeding Farm. Tree is a strong vigorous upright grower, unusually large leaves which are resistant to leaf spot. The fruit is large to very large. Color clear light red, skin thin. The flavor is very good. Stone small and free.

NORTHSTAR CHERRY—

A cross between Serbian pie cherry and the regular English Morella which makes for one of the hardiest cherries, as well as a relatively small tree. Fruit is dark red at maturity, skin is medium tender, flesh is juicy, tender and meaty. The stone is small and free.

Prices of Northstar and Meteor Cherries—

4-5 ft., \$2.25 each; one of each variety, \$4.00.

RASPBERRIES

Raspberries are at their best in the north central states. Plant your own and forget about the expense and difficulty of buying them on the market. They may be set out in the spring or fall. The plants should be 3 feet apart in the row and at a distance of 6 to 7 feet between rows. Raspberries produce big yields and sure profits.

LATHAM—

Latham is the leading commercial and home variety. It is vigorous, easy to grow, a heavy producer, and hardy enough to stand sub-zero winters. The fruit is very large, dark red and firm; picks easily, keeps and ships well. Delicious eaten fresh, in sauce, jam, pies or shortcake. It has the qualities that make it the leading Red Raspberry of the day. No. 1 plants, 12 for \$2.50, 25 for \$4.25, 50 for \$7.50, 100 for \$13.50.

CUMBERLAND (BLACK)—

This is the most popular of the Black Raspberries. Fruit is large, firm and of good quality. Tips, 12 for \$2.50; 25 for \$4.25, 50 for \$7.50, 100 for \$13.50.

Plums

UNDERWOOD—

The Underwood is valuable because of its large, early fruit and annual bearing. It is the earliest of the large Plums, attaining a size of 1 $\frac{3}{4}$ inches in diameter. Fruit is attractive red with splendid quality, small pit.

SUPERIOR—

One of the very largest and very best of the Jumbo Plums originated by the Minnesota State Fruit Breeding Farm. The tree bears early and is a regular and heavy cropper. The fruit is very large, firm fleshed, beautiful red color and delicious quality to eat out of hand. Superior is one of the better Plums for home or for market.

POLLENIZERS FOR MINNESOTA PLUMS—

It is necessary to plant one or two pollinating Plums with any of the Minnesota hybrids in order to get good yields. It has been found that the Minnesota hybrids do not fertilize one another and we recommend the following varieties which will effectively pollenate the standard varieties.

PLUM POLLENIZER—

The best Plum pollenizer for our Minnesota hybrids. Sweet and tasty, it is a valuable addition to the home planting.

Prices of all Plum Trees

5-7 ft. \$2.25 each; 3 for \$6.00

Grapes

RED AMBER—

This is undoubtedly one of the best of the recent introductions of the Minnesota State Fruit Breeding Farm. A very fine, large, red Grape of exceptionally high quality. Perfectly hardy and need not be covered.

BLUE JAY—

This grape has very compact, large clusters of berries, about the same size as Concord. They are dull black and covered with a bluish bloom. When first colored and apparently ripe, they are rather acid, but if allowed to remain on the vine for 10 to 14 days longer, they become mild and pleasing in flavor. Also good for making juice or jelly. This needs to be planted near some other variety that will furnish pollen.

MOONBEAM—

This "white" Grape with a mild and sweet flavor is borne in medium sized clusters, but the berries are large. It is an excellent ornamental variety because the clean, attractive leaves are dark green above and silvery beneath. Prices of Blue Jay, Red Amber and Moonbeam Grapes, 2 yr., 70¢; 3 for \$1.85.

BETA GRAPE—

A heavy, annual bearer, hardy as the wild grape. Medium size black fruit of extra good quality for juice and jelly, and ripens so early that it can be grown far north. The Beta withstands our severe northern winters without protection. They may be grown on fences, over a building, or in a windmill tower and should bear heavily every year.

FREDONIA—

The new outstanding, early black Grape. Fredonia is the earliest good black Grape. The vine is vigorous and productive and ripens its fruit 3 weeks earlier than Concord. Fruit is large, sweet and of good quality. Prices of Beta and Fredonia grapes, 2 yr., 50¢; 6 for \$2.50.

Hardy Perennials

Perennials are becoming more and more popular with the increase in gardening. No home grounds are now completely planted without a border of these continuously blooming plants. If you plan carefully you can have flowers all year. For your selection there is listed here a wide variety of those dependable, hardy plants, that once established, assure you of a succession of blooms without the constant trouble of replanting.

Prices of perennials, except as noted:
40¢ each; 12 for \$4.00

FALL BLOOMING ASTERS

ADORABLE—

Best true pink hardy aster. Habit and growth are similar to Harrington Pink but color is slightly deeper salmon pink. 45¢.

MOUNT EVEREST—

The finest and best white aster. It forms very tall, well-shaped pointed pyramids with an abundance of lateral growths, which flower right down to the ground. Makes wonderful bouquets as cut flowers. 45¢.

BLUE GEM—

Large, lovely flowers of blue with a yellow center, best blue in cultivation. September until frost. 3 to 4 feet. 45¢.

BEECHWOOD CHALLENGER—

This variety is in our opinion the closest to red we have been able to come so far in Hardy Asters. It is free-flowering, of medium height, and brilliant crimson-red color. Planted together with Mount Everest the contrast is striking. 45¢.

COLUMBINE

Delicate flowers in many colors. Long spurred. June and July. 24 inches.

PLATYCODON

BALLOON FLOWER—

Large, showy, balloon-shaped buds which open to star-shaped flowers. June to September.

FERNS

OSTRICH PLUME FERNS—

Fine for that shady corner. 25¢ each; \$2.50 per 12.

BLEEDING HEART

DIELYTRA SPECTABILIS—

Blooms May to June. Height 3 feet. Flowers pink and white, heart-shaped. 75¢.

D. EXIMIA—

Plumy Bleeding Heart. Finely cut, fern-like foliage with showy rose-colored flowers. Blooms all summer. Stands partial shade. Height, 18 inches. 75¢.

Perennial Phlox

Field grown plants, 40¢ each;
12 for \$4.00

SUBULATA (CREEPING PHLOX)—

Blooms in May, when whole plant is a vivid mass of lavender-pink. Very bushy.

AFRICA—

Brilliant carmine-red with a deep blood-red eye.

RIJNSTROOM—

Lively shade of rose-pink, very large.

R. P. STRUTHERS—

Tall. A bright rosy carmine with claret eye.

MARY LOUISE—

A good grower of medium height with clean foliage. Produces pure glistening snow-white heads of unusually large size, the individual flowers being twice as large as other white varieties.

STARLIGHT—

A comparatively new Phlox. Deep violet fading to lilac, with a large, star-shaped white center. A good tall Phlox.

BRIDESMAID—

White with crimson eye.

ENCHANTRESS—

Bright salmon pink. Dark eye.

SALMON GLOW—

Large florets of deep salmon.

SAN ANTONIA—

Blood-red. Large florets.

DELPHINIUM

BELLADONNA—

The freest and most continuous blooming of all, never being out of flowers from the end of June until cut down by hard frost. The clear turquoise-blue of its flowers is not equalled for delicacy and beauty by any other flower.

D. BELLAMOSA—

A free-blooming, dark blue type.

BLACKMORE—LANGDON STRAIN—

A famous English strain. All the clear shades of blue, with bees of contrasting colors.

Peonies

A few choice plants of Peonies will fill your garden with color and fragrance from late May through June. Even the rose cannot excel in beauty and charm the flowers of the modern Peony. Here, under our northern conditions, it is peer of all flowers in combining so well the qualities of absolute hardiness, great color variation, size, beauty and fragrance of bloom.

BARONESS SCHROEDER—

Light pink tint, opening to pure white. Globe shaped. Late. \$1.00.

EDULIS SUPERBA—

Bright mauve pink. Early. \$1.00.

FELIX CROUSSE—

Brilliant red. Large globular flowers. Fragrant. \$1.00.

FESTIVA MAXIMA—

Early and very large. White, with center flaked crimson. Splendid in every way. \$1.00.

KARL ROSEFIELD—

Rich, glowing crimson. Immense, solid flower. Superb variety. Midseason. \$1.00.

SARAH BERNHARDT—

Apple blossom pink, silver-tipped. Midseason. Fragrance. \$1.00.

LILIES

REGAL—

The large, trumpet-shaped flowers are snowy white, with a pure yellow center, while the exterior of the petals is slightly tinged pink. It is a strong grower, attaining the height of three or four feet. The flowers are beautiful, possessing a delightful fragrance. **Large bulbs, 30¢.**

ELEGANS—

The fiery-red blooms of this lily are borne in large clusters on medium height, stocky stems. Blooms profusely in June and July and is very hardy. **Large blooming size bulbs, 30¢ each.**

SINGLE TIGER—

Five feet. Produces an abundance of orange-scarlet flowers in August. Very hardy and vigorous. **Large bulbs, 30¢ each.**

CORAL LILY—

2 feet. The brilliant coral-red flowers are borne in clusters of 5-15 on slender stems. Fine for rock garden or border. **Bulbs, 25¢ each.**

COREOPSIS

Large brilliant yellow flowers. Stems long, graceful. Blooms all summer. 2 feet.

CORAL BELLS

Low-growing, tufted, plants which bear a profusion of dainty coral-red flowers on long, slender stems. Blooms nearly all summer.

GYPSOPHILA

BRISTOL FAIRY—

A double Baby Breath of great vigor, producing large panicles of flowers and blooming more or less continuously all summer, if first blooms are cut. **75¢.**

ROSY VEIL—

A new dwarf pink double-flowering Gypsophila. Established plants reach a height of 2 feet and bloom in summer and fall. They start blooming 2 weeks earlier than the tall double Gypsophila and continue later in the season. Fit perfectly in the garden and are fine for cutting. **75¢.**

GAILLARDIA

Gay blooms with reddish-brown centers and yellow, daisy-like petals ringed with red. June to November. 18 to 24 inches. Fine for cutting.

LYTHRUM

PURPLE LOOSESTRIFE MORDENA—

This is a new Lythrum brought out by the Canadian Experimental Farm at Morden, Manitoba. We think it the best of all the Lythrum and a great improvement over the old types. Long upright growing stems just covered their length with little deep bright rose-pink flowers. This is a good one. Showy plants for moist, shady borders, and watersides. A very useful cut flower blooms nearly all summer. **Blooming size plants, 50¢.**

PYRETHRUM ROSEUM

PAINTED DAISY—

Beautiful daisies of pink and red cover the plant in June. 2 feet.

SHASTA DAISY

ALASKA—

In July and August bears a great profusion of immense, gleaming white blooms, excellent for cutting. 18-24 inch.

MOUNT SHASTA (Double)—

The pure white flowers are completely double and produce freely from June to October. They are of excellent lasting quality. The stems are about 18 inches high, very stiff, holding the heavy double pure white blooms upright. Excellent for the border as well as for cutting. **50¢ each.**

PRICES OF PERENNIALS, unless noted otherwise, 40¢ each; 12 for \$4.00

Cutting's Quality Started Plants

For Your Vegetable Garden

NEW HYBRID TOMATO PLANTS—

In our tomato trial garden we find the hybrid varieties far superior to the standard kinds in quality, size and yield.

Bright red fruits, smooth, globular and free from cracks and blemishes. The walls are thick and interiors firm and meaty.

Big Early—Early. Fordhook—Early. Burpee—Midseason. Clinton—Midseason. Big Boy—Midseason.

Landscape Service

If your home needs some trees, shrubs and evergreens and you do not know what to plant or how to arrange it, we want you to feel free to ask us to give you the benefit of our many years of experience in planning and planting home grounds. We will be glad to go to your home and assist you with your problems about foundation plantings, "outdoor living rooms," and hedges.

We will tell you what you need and you will find that our prices are very reasonable and our stock of the highest grade. This service is free and places you under no obligation.

Garden Chrysanthemums

AUTUMN BEAUTY—

Immense, 4-inch flowers of bright mahogany shaded maroon, underlaid with gold. Very early.

REFLECTION—

Splendid early, full double, deep lavender-pink. Very dependable and free flowering.

CHARLES NYE—

Large fully-double, rounded flowers of rich buttercup yellow and firm substance.

CHIPPEWA—

Very showy, giant 4 inch aster-like blooms from early September 'till frost.

DRIFTED SNOW—

Snow white flowers with a slight yellow tint at center.

DR. LONGLEY—

Very early, full double, bright rose-pink.

EARLY KATHLEEN—

Double, early, coppery-bronze.

Above Varieties, 30¢ each, 4 for \$1.00.

F.O.B. Byron

EARLY HARVEST—

A mass of glowing mahogany-orange flowers. One of the very best early Mums and far superior to any cushion variety.

DELIGHT—

The best popular early variety, golden-yellow.

GOLDEN MOUND—

Excellent golden-yellow cushion.

MINNPINK—

New, rose-pink cushion.

ORCHID HELEN—

Sturdy orchid-pink of unusual beauty and vigor.

TRIBUTE—

Large, fully double flower opening bright daphne-red and maturing to daphne-pink.

VIOLET—

Dr. Longley's newest purple. Full double dahlia-like bloom of good color and substance.

VULCAN—

Very early, bright red.

WENONAH—

Early flowering pure soft lavender pompon.

Above Varieties, 30¢ each, 4 for \$1.00.

CUTTING'S RELIABLE LAWN SEED

We mix our own lawn seed, using a formula developed as a result of experiments by the lawn specialist at University Farm, supplemented by our experience in making lawns in Minnesota.

Our mixture contains Kentucky Blue Grass, Red Fescue, Perennial Rye Grass and White Clover. Use one pound to 250 square feet.
